

# TIPS FOR SCIENCE COURSES

## ORGANIZATION

Just like any college course, organization is extremely important. Use a planner to keep track of your lab schedule, homework due dates, and exams. Also, make sure to gather any materials and equipment you need for labs ahead of time.

## METRIC SYSTEM

Make sure that you are familiar with the Metric system as you will be required to use it in the majority, if not all of your science courses.

## MATH SKILLS

Most science majors will have a math course as some kind of prerequisite. Be prepared to apply math skills you have learned to real world situations.

## FLASHCARDS

In science courses, especially for multiple choice exams, you will simply need to remember new concepts and vocabulary. The flashcard program Anki makes studying easy.
